March 2018: Economic Sentiment decreases in both the euro area and the EU

In March, the *Economic Sentiment Indicator* (ESI) decreased markedly in both the euro area (by 1.6 points to 112.6) and the EU (by 1.9 points to 112.5).¹ While this is the third consecutive drop, the indicators remain at elevated levels.

Euro area developments

The deterioration of euro-area sentiment resulted from drops in industry, services and retail trade. Confidence among consumers remained unchanged, while it increased among construction managers. The ESI weakened in all the five largest euro-area economies; significantly so in Germany (-2.4), Italy (-1.8) and Spain (-1.2) and, less so, in the Netherlands (-0.5) and France (-0.4).

The marked decrease in **industry confidence** (-1.6) resulted from managers' more pessimistic views on all three components, i.e. *production expectations*, the *current level of overall order books*, and the *stocks of finished products*. Managers' assessments of the *past production* and *export order books* – which are not included in the confidence indicator – deteriorated, too. Also the marked decline in **services confidence** (-1.3) was driven by managers' more pessimistic views on all three components: the *past business situation*, *demand expectations* and, in particular, *past demand*. Unchanged **consumer confidence** (± 0.0) reflected broadly stable views on households' *future financial situation*, while their improved *unemployment expectations* were offset by more negative assessments of the *future general economic situation* and consumers' *savings expectations*. The strong fall in **retail trade confidence** (-2.9) resulted from more negative views on both the *past* and *expected business situation* and, to a lesser extent, on the adequacy of the *volume of stocks*. Increasing **construction confidence** (+0.9) was driven by upward revisions of both managers' *employment expectations* and their assessment of the level of *order books*. Finally, the fall (-5.4) in **financial services confidence** (not included in the ESI) resulted from a sharp deterioration in managers' assessments of the *past business situation* and *past demand*, while their views on *future demand* improved.

Employment plans saw an upward revision in services and construction, while they worsened markedly in retail trade and, to a lesser extent, in industry. **Selling price expectations** increased slightly in retail trade and more importantly in construction, while they decreased in industry and services. Also consumer price expectations dropped in March.

EU developments

The marginally stronger decrease of the headline indicator for the EU (-1.9) was mainly due to the marked deterioration of sentiment in the largest non-euro area EU economies, the UK (-4.2), and Poland (-2.0). In line with the euro area, confidence deteriorated strongly in industry, services, and retail trade, while it increased slightly in the construction sector and remained unchanged among consumers. The fall in EU confidence in the financial services sector was slightly less pronounced than in the euro area.

By contrast to the euro area, EU managers' employment expectations improved in retail trade, while they remained broadly stable in services. Price expectations differed from the euro area mainly in retail trade, where they decreased markedly.

¹ The business confidence indices for France were revised compared to the February press release, causing an upward revision of the ESI for February of 0.1 points in both the euro area (to 114.2) and the EU (to 114.4).

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2017) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances.

The country weights have been updated in January 2018.

(a) Business surveys for Ireland have been temporarily discontinued as from 05/2008.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The Directorate-General Financial and Economic Affairs (DG ECFIN) of the European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by DG ECFIN's Unit Economic situation, forecasts, business and consumer surveys (A3), Sector Business and consumer surveys and short-term forecast.
